MettleUp — demo guide

Gym desk website: **app.mettleup.fit** (laptop or phone) · Member app: **MettleUp** on Android. Arrows (→) show what to tap, in order. On a phone, the desk keeps Shop, Messages & offers and the rest under **More**.

Only in MettleUp — what GGMS does not give

Checked against GGMS's own website (ggms.in) and its app listing. Show these first.

	WHAT ONLY METTLEUP GIVES	SHOW IT (DESK, THEN MEMBER PHONE)

1	**A shop for the gym, inside the member app**
	Members order protein, creatine, gear and drinks from their phone. The desk gets the order, marks it ready, and the member pays when they collect it. Stock goes down by itself.
	Extra money from the members the gym already has.
		`Desk: Shop → Turn on the shop (12 sample products) → Products → + Add product`
		`Phone: Gym → Shop → product → Add to bag → bag icon → Place order`
		`Desk: Shop → Orders → Mark ready → Collected (paid)`

2	**Workout offers that reward coming to the gym**
	"Train 12 times in 30 days, get 7 extra days." Members join on their phone and see their count go up. The days are added by the desk or by themselves.
	New members build the habit, so they renew.
		`Desk: Messages & offers → Workout offer → Start offer`
		`Phone: Gym → My gym → offer card → Join the offer`
		`Desk: Give N days (or set "By themselves")`

3	**Messages and offers straight to members' phones** Ready messages for festival offers, gym closed, new timings, events and more. They pop up on the phone, at no SMS cost. The desk sees who read each one and can take it back. Not spam: only 2 pop-ups a day, 1 offer a day.	`Desk: Messages & offers → Messages → Offers → Festival offer → Who gets it → Send in the app → Yes, send` `Phone: pop-up, or Gym → bell icon → Messages`
4	**A full workout app for every member** Log sets, kg and reps; rest timer; the kg to beat; records, charts and a monthly report. GGMS's member app shows plan, attendance and payments only. Members open it every workout, with the gym's name on it.	`Phone: Workout → Start empty workout → Add exercise → Add set → Finish workout → Progress`
5	**Challenges and a gym leaderboard** A 7 to 31 day challenge by workouts or kg lifted, with free days as the prize. Members see their rank in the gym.	`Desk: Challenges → New challenge → Start challenge` `Phone: Gym → Leaderboard`
6	**The gym's own logo and colours in the app** The member app shows the gym's logo and brand colour.	`Desk: Branding → Upload logo → Your brand colour → Save`
7	**"How busy is the gym?" for members** Members see if the gym is quiet now, and the quietest time later today. Made from check-ins; nothing to set up.	`Phone: Gym → My gym → How busy the gym is`
8	**Pause or renew from the app** NEW The member asks; the desk approves with one tap. Renewal is still paid at the desk.	`Phone: Gym → My gym → Pause my plan / Renew my plan → Send to the desk` `Desk: Today → Requests from the app → Approve`
9	**Move in from any Excel, with AI** AI reads any column layout, so nothing is retyped. One tap undoes an import.	`Desk: Members → Import from Excel → Choose file → Add N members · Past imports → Undo this import`
10	**Members losing the habit** Everyone who has not come for 10 days, before their plan ends.	`Desk: Visits → Losing the habit · or Today → Losing the habit → See all`

Members also get: smartwatch, home-screen widgets, Health Connect, and bringing in old workouts from Hevy or Strong.

Before the client arrives

☐ Desk: sign in at app.mettleup.fit with a **real gym** (the demo gym hides Shop, Messages and Challenges). The gym must be online: `Settings → Put your gym online`.

☐ Shop: `Shop → Turn on the shop`, and give 2 products a photo. Start one `Workout offer` and one `Challenge`.

☐ Phone: MettleUp **0.62.0**, joined to that gym (`Gym → Join your gym`). Check in once with the poster so "My gym" shows the plan.

☐ Print the gym QR poster: `Visits → Check-in QR → Print poster`.

Demo order (about 25 minutes)

1. **The shop.** Phone: `Gym → Shop` → order a protein → `Place order`. Desk: `Shop → Orders` shows it → `Mark ready` → the phone says "Collect it at the desk" → `Collected (paid)`.
2. **A festival offer to every member.** Desk: `Messages & offers → Messages → Offers → Festival offer` → `Send in the app`. The phone gets the pop-up. Desk shows who read it.
3. **The workout offer.** Phone: `Gym → My gym → Join the offer`. Show "C of N workouts". Desk: the member is in the offer list.
4. **The owner's morning.** Desk: `Today`: money owed, renewals due, members losing the habit, shop orders, requests from the app.
5. **Plans ending soon.** `Ending in 1-3 days → WhatsApp all`. One tap per member, the message is already written.
6. **Join and pay.** `Today → New member` → `Take photo` → `Sell membership` → `Collect payment` → receipt → `Send on WhatsApp`.
7. **Check in with the poster.** Phone: `Gym → My gym → Check in` → scan. Desk: `Visits` shows the visit.
8. **Log a workout.** Phone: `Workout → Start empty workout → Add exercise → Add set`. Show the rest timer and the kg to beat → `Finish workout` → `Picture`.
9. **Challenge and leaderboard.** Phone: `Gym → Leaderboard`. Desk: `Challenges`.
10. **Pause from the app.** Phone: `Gym → My gym → Pause my plan → Send to the desk`. Desk: `Today → Requests from the app → Approve`.
11. **Gym sends a plan.** Desk: member → `Workout plans → Send a plan`. Phone: it shows on the `Workout` tab.
12. **Their logo.** Desk: `Branding → Upload logo → Save`. The phone shows the gym's logo.
13. **Moving from GGMS.** Desk: `Members → Import from Excel → Choose file`. AI matches the columns.
14. **The money picture.** Desk: `Money` and `Expenses` → `Download Excel file`.

Points to say

• Shop, workout offers and messages to phones: the gym earns more, and members keep coming.
• Members get a full workout app for free, with the gym's name on it.
• The desk works on a laptop or a phone. Each staff member gets their own sign-in code and PIN.

Top 20 for the gym (desk website)

	FEATURE	WHERE TO FIND IT
1	**Gym shop** Products, stock and member orders.	`Shop → Turn on the shop · Products → + Add product · Orders → Mark ready → Collected (paid)`
